DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 22 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 22 recites the rigid wall and the opposite resilient wall, along with the central web and the plurality of resilient arms which extend from the resilient wall. In the specification and each of the other independent claims 1, 18, and 21, the resilient arms are utilized to urge the component against the claimed rigid wall, thereby securing the component in the cavity of the chain. In claim 22, the language merely recites the resilient arms frictionally engaging the component to retain the component in the cavity. There is no mention that the rigid wall aids in supporting the component in the cavity. Based on the specification and drawings, there is no explanation or diagram that would lead one to believe that the resilient arms are capable of supporting the component by themselves, without the aid of the rigid wall, which is suggested in claim 22. Please clarify.

Allowable Subject Matter

2. Claims 1-21 are allowed.

In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
